

Name: Equal

Dimension: 1000x1000x330 mm

Material: wood with lacquered surface

Designed by: Frank Chou Design Studio

Year: 2025

Design Specification

Equal Coffee Table reinterprets the essence of everyday objects through an architectural design language. Composed of precisely arranged lacquered rectangular modules in symmetrical geometric order, its high-gloss surface achieves a mirror-like finish, creating a striking matrix effect.

The clean, grid-like silhouette echoes the rationality of urban planning, where each module maintains independence while forming structural cohesion—mirroring humanity's collaborative paradigm: individuals retain autonomy yet achieve greater stability through systemic connections. The stacked volumes metaphorically reflect societal and intellectual progression. Like generational advancement in civilization and technology, each tier serves as a foundational block for subsequent development. Notably, this system remains intentionally non-hermetic—cross-industry and cross-cultural interactions function as conceptual "interfaces" and generative gaps, enabling breakthroughs into new dimensions of innovation.
